

ULTRASONIC 5P

SOLID DEGREASER DESCALING DETERGENT

ULTRASONIC 5P is a specially formulated to be used as a degreasing powder for cleaning and descaling of all types of materials and metals (including aluminum and alloys) by immersion or ultrasonic cleaning machines product.

With its balanced formulation of surfactants, sequestering and non-caustic alkalis, ULTRASONIC 5P has properties particularly suitable for removing encrusted grease, oils and any dirt hard, preventing redeposit on the cleaned parts sediments. His quelating agents prevent the precipitation of calcium and magnesium, the product when used in hard water without altering its cleaning power sales. Its surfactants carefully selected facilitate the penetration of the product into the soil giving a great detergent and degreaser. ULTRASONIC 5P contains in its formulation surfactants reduce the surface tension of water, giving a great moisturizing power.

DOSAGE AND METHOD OF USE

ULTRASONIC 20 is used diluted in ultrasonic water tank to a ratio of 1-5% depending on the degree of soiling.

TECHNICAL SPECIFICATIONS

COLOR	WHITE / YELLOWISH
ASPECT	POWDER
OLOR	CHARACTERISTIC
RELATIVE DENSITY	0,85 +/- 0,05 g/cm ³
pH 1%	11,7 +/- 0,5

CONTAINS

From 15 – 30 %	Phosphates
From 5 – 15 %	Anionic Surfactants
From 5 – 15 %	Silicates
< 5 %	Noionic Surfactants

This product meets the existing legislation on biodegradability and Technical Sanitary Regulation on Detergents.
