

# ULTRASONIC 20-A

## DETERGENT FOR DEGREASING METAL PARTS IN ULTRASOUND MACHINES

ULTRASONIC 20-A is a product specially formulated for use as a degreaser of metal parts by immersion in ultrasonic cleaning machines.

ULTRASONIC-20-A is a slightly alkaline degreaser formulated to be used as detergent for cleaning metal parts and tools in ultrasonic cleaning machines and special light alloys, including aluminum. With great ability to absorb dirt, it is specially formulated for removing traces of polishing paste, oils, lubricants and greases. With its balanced formulation is a highly lime water sequestering product, preventing scale formation.

### DOSAGE AND METHOD OF USE

Diluted in water, its may be used in ultrasonic tank at a rate between 3 and 5% depending on the type of soil to be removed. Working temperature: between 40 - 70 ° C.

### TECHNICAL CHARACTERISTICS

COLOR : YELLOW

ASPECT: TRANSPARENT LIQUID

SMELL: CHARACTERISTIC

DENSITY: 1,28 +/- 0,05 g/cm<sup>3</sup>

PH TO 1%: 12,0 +/- 0,

### CONTAINS AMONG OTHER COMPONENTS

Between 15 – 30% Phosphates

Between 5 - 15% Anionics surfactants

< 5% No ionic surfactants and phosphonates

This product meets the existing legislation on biodegradability and the Sanitary Technical Regulation on Detergents.
