

ULTRASONIC 23L

ULTRASOUND MACHINES ALCALINE DESCALER AND DESENGRASER

ULTRASONIC 23L is an alkaline degreaser, formulated with an equilibrated formula with surfactants, complexing agents and alkaline components, which gives the properties particularly suitable for removing plaque embedded fats, oils and any kind of stubborn dirt. Suitable for use as a degreaser and descaler in cleaning systems immersion ultrasound machines.

DOSE AND WAY OF USE

In cleaning systems by immersion in ultrasound machines is used at a ratio between 5% and 10% depending on the degree of dirt.

On non-ferrous metals previously check the suitability of the product.

TECHNICAL SPECIFICATIONS

COLOUR: BROWN

APPEARANCE: LIQUID

SMELL: CHARACTERISTIC

DENSITY: 1,40 +/- 0,05 g/cm³

PH TO 1%: 13,2 +/- 0,5

CONTAINS AMONG OTHER COMPONENTS

> 30 % Potassium hydroxide (KOH)

5% – 15 % Non ionic surfactants

This product meets the existing legislation on biodegradability and Health Technical Regulation on Detergents.
